

# AMTC HYBRIDFLO™ Automatic Faucet System

## Powered By AXIO™ Touch-Free Technology

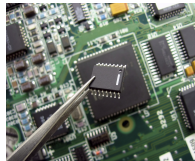

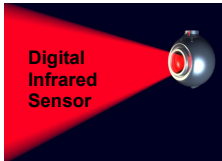

The AMTC HYBRIDFLO™ Automatic Faucet incorporates AMTC's AXIO™ Touch-Free Technology including the patented BRV® mechanism with a state of the art high quality automatic faucet system. By using proprietary brass cam gear technology, the HYBRIDFLO™ Automatic Faucet System achieves an **industry leading level of reliability**. The faucets are built of high quality solid brass and are available in a variety of spout models and power options. The design of the control box allows for easy installation and protects all mechanical and electrical components. An easy to clean filter assures easy maintenance, extended life, and ultimate performance.

### Powered by AXIO™ Touch-Free Technology!

HYBRIDFLO™ faucet systems are powered by revolutionary AXIO™ Touch-Free Technology which includes a proprietary digital infrared sensor, dependable water and humidity proof circuitry controlling all electrical components, and reliable brass cam gear technology. AXIO™ delivers unmatched Reliability and cost effective performance.

Model: AEF-301 Pictured

### AXIO™ is Accurate - Dependable - Reliable

### Features AMTC's Patented BRV® Mechanism!

HYBRIDFLO™ faucet systems operate using the unique patented BRV® mechanism that replaces the faulty solenoid mechanisms usually found in most competitive touch-free faucet systems. That means less maintenance and less costly repairs.

#### AMTC® BRV® Mechanism (New Technology)

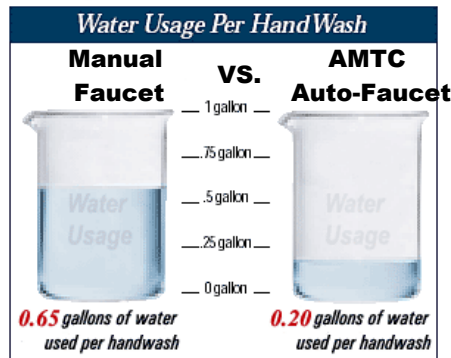

- Dry operation prevents corrosion of parts
- No replacement parts needed
- Successfully tested over 1.5 million cycles

#### Solenoid Mechanisms (Old Technology)

- Wet operation leads to corrosion of parts
- Corrosion of parts leads to failure
- Replacement parts cost \$100.00-\$200.00

#### Standard Manual Faucet

#### AMTC HYBRIDFLO™ Automatic Faucet

**Up to 70% Water Savings!**
